

INOEX ACHIEVES CERTIFIED PARTNER STATUS IN MICROSOFT PARTNER PROGRAM

Mobile Data Collection System Canvass Helps Company Attain Recognized Competency as an Independent Software Vendor

OAKVILLE, ON – MAY 21, 2007 – Inovex Inc. (“Inovex”), custom software developer and services provider, today announced that it has achieved Certified Partner status in the Microsoft Partner Program, with a recognized competency as an Independent Software Vendor.

The Microsoft ISV/Software Solutions Competency recognizes the skill and focus technology partners bring to a particular solution set. Microsoft Certified Partners that have obtained this competency have a record of developing and marketing packaged software based on Microsoft-based technologies.

Inovex has been developing software solutions based on Microsoft’s leading edge technologies and development tools for nearly five years. Therefore, it was a natural decision for the company to build its Mobile Data Collection System, Canvass, using the Microsoft .NET-based platform. Inovex recognizes the value in developing solutions that help provide increased scalability, reliability, and extensibility, and sees Microsoft as a valuable technology partner in the attainment of this goal.

“In order to achieve this certification, we not only had our Mobile Data Collection system, Canvass, platform tested by VeriTest, but we were also endorsed by two of our long-term clients; York Region and Siemens”, said Mike Branch, President of Inovex Inc. “It is a validation of both the quality of our solutions, and our dedication to client satisfaction.”

“Microsoft Certified Partner status is only attained by some of the most skilled and innovative technology providers in Canada,” said Lora Gernon, Director of Partner Group, Microsoft Canada Co. “We are pleased to add Inovex to this group and look forward to their continued commitment to their customers and impact on the Canadian technology partner ecosystem.”

About Inovex Inc.

Founded May 2003, Inovex has carved itself into the software industry through its dedication to quality, service and value. Its highly structured approach is what distinguishes the organization: dedication to robust design translates into organized, adaptable and timely solutions.

Its clients include small businesses and large industry leaders who are searching for ways to improve their competitive edge, or cut excessive administrative costs. Although rooted in the custom software domain, Inovex has recently launched a number of productivity products including its mobile data collection system, Canvass, which gives upper management clear visibility to mobile operations across a number of verticals (see <http://canvass.inovex.ca>).

Inovex prides itself on being a cutting edge, fresh and energetic company that is able to provide innovative, dynamic solutions. Its vibrant team of technical specialists and business analysts provide the professionalism and vision that its clients value in their custom solutions.
